(54) PLASTER

(57)Abstract:

PURPOSE: To provide a plaster rich in the followability in response to the expansion of skin at a plaster-adhered site and capable of exhibiting high adhesivity to the skin over a long time.

CONSTITUTION: A plaster having a plaster material layer on a substrate is characterized by having a 50% modulus of 10-600g/cm in one direction. The addition of a medicine to the plaster material layer can give an excellent percutaneous absorptive preparation exhibiting the activity of the medicine over a long time.

LEGAL STATUS

[Date of request for examination] 29.10.1998

[Date of sending the examiner's decision of rejection] 17.04.2001

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
